# Outline

- The process I am trying to improve
- Modernization of traditional way of implementing safety and security
- Ideation process

Hello! 🙌

My name is Nikko.

What is a security logbook

Google Search

I'm Feeling Lucky

Google offered in: [Filipino](#) [Cebuano](#)

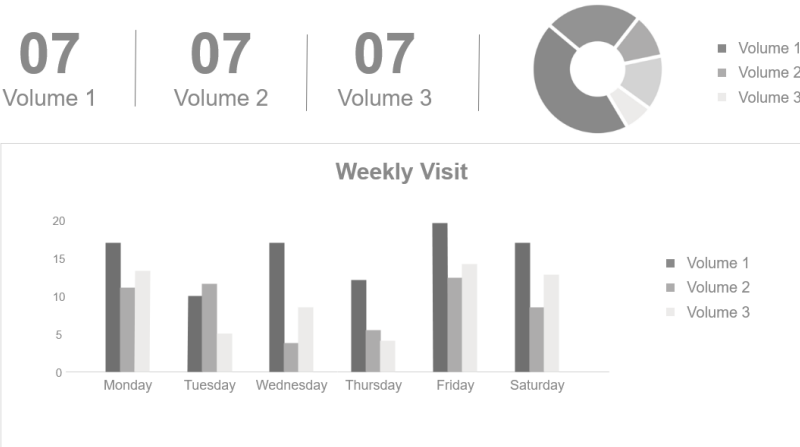

# Visitor Management Systems

Modernizing security logbooks

# Web Registration

Speed up verification process  
During the visitor’s scheduled visit  
by using the web portal.

# Insights

# Real-time Monitoring

Visibility of people who are currently on-site.  
This will help answer  
Inquiries from visitors

# Notification

Receive notification if an employee has a visitor. This feature will help avoid any disturbances in the office during work hours.

Provide daily figures for daily, weekly, and monthly visits. The goal is to forecast the needed man power and implement changes to better cater the needs of the visitor

**Steps that I took**

## **Reading**

Understanding of the problem  
and searching for solutions

## **Experience**

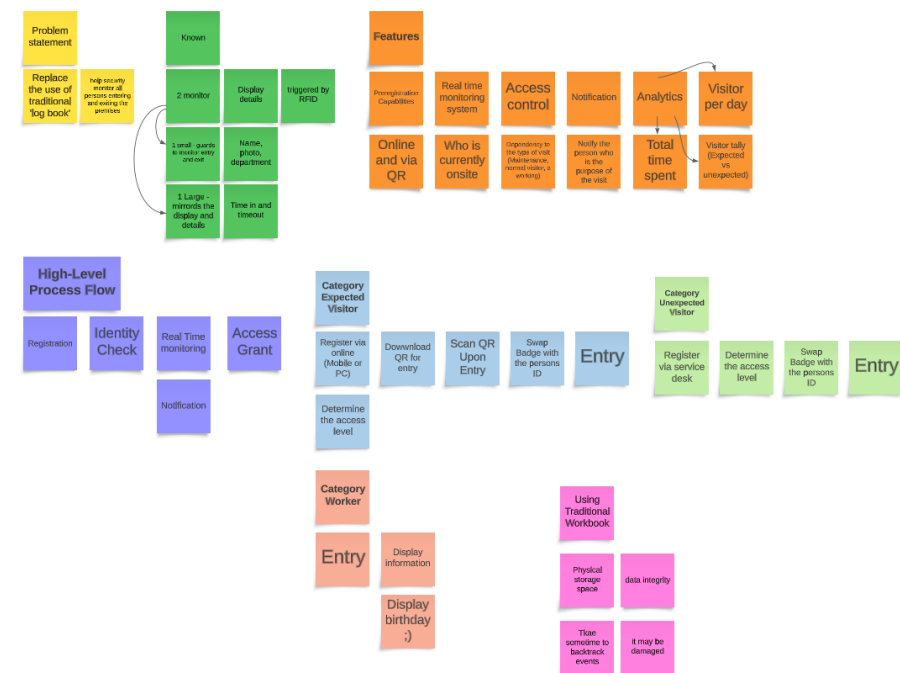

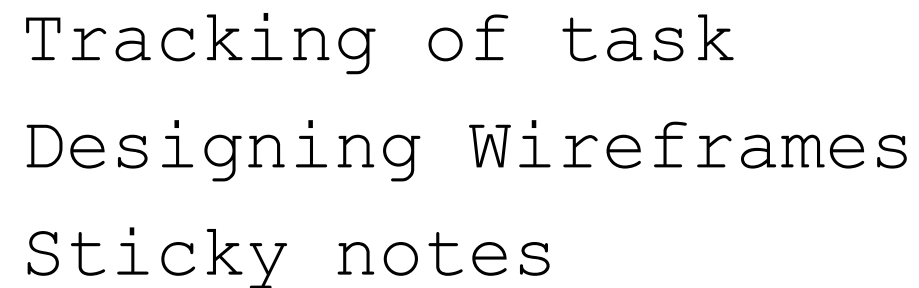

Recalling of memories where I  
was in the situation

## **Brainstorming**

Letting my creativity and  
ideas out

Visitor Entry – 1
